

EDGE™

HAWKER® EDGE™ 2.0 is an advanced calculation and application modeling software featuring sizing and financial information; providing data driven reports to help inform operation power solution decisions. This software can be utilized to generate easy-to-read, interactive reports that can be shared with key decision makers when modelling custom power solution systems.

- Upload data from the HAWKER® Battery Boss™ WC (BBWC) to model with actual energy requirements.
- Multi-site and multi-truck capable.
- Receive recommendations across a broad range of solutions based on Fitment, Energy, Preference and Financial Requirements
- Model multiple batteries, profiles and chargers for comparison.
- Model up to one week.
 - Including up to 3 shifts and 7 separate weekly schedules.
- Includes battery conversion from internal combustion to electric.
- Calculates financial savings
- Calculates Return on Investment (ROI) and Total Cost of Ownership (TCO).
- Data can be exported in a visual reporting format that can be emailed, printed, and saved as a PDF.
- Verification approval by a HAWKER® Product Manager available.

Empower your motive power operation with informed, data-backed decisions! Contact your local HAWKER® Representative for a custom motive power solution system today.
