DESCRIPTION

The HAWKER® ABI™ advanced battery interface consists of a display powered by the battery via the truck cables. It reads, in real time and wirelessly, data from the BBWC4 battery monitoring device, HAWKER FLEX® Li3, HAWKER FLEX® TPPL, and

HAWKER FLEX® Elite TPPL batteries, displaying alerts, alarms, SoC (State of Charge), and other useful parameters to optimize the operation of the battery.

Features

- Available for Flooded, HAWKER FLEX® TPPL, HAWKER FLEX® Elite batteries
 - HAWKER® ABI™ advanced battery interface PN2H with CAN
- Available for HAWKER FLEX® Li3 and HAWKER FLEX® Elite batteries
 - HAWKER® ABI™ advanced battery interface PN3H
- Touch screen display
- Multiple communication channels
 - CAN-BUS to BBWC4 & Battery BMS
 - Bluetooth to BBWC3 and later versions
- Adjustable SoC Warning and providing an audible buzzing alarm for HAWKER FLEX® Li3, HAWKER FLEX® TPPL, and HAWKER FLEX® Elite batteries

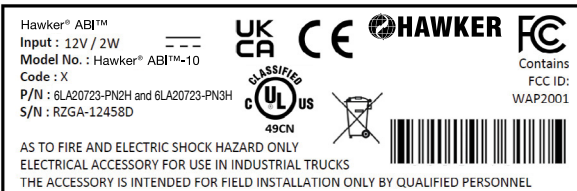

*Applies to North American version only; please contact your HAWKER® representative for more details.

Technical Specifications

Item	Description
Input Voltage	15V to 120V (PN2H) 12V (PN3H)
Nominal Battery Voltage	24V-96V (PN2H)
Operating Temperature	32–160°F (0–70°C)
Voltage Accuracy	0.1V
Altitude	<2,000m (<6,561ft)
Power Consumption	2 Watt
Wireless Interface	Bluetooth® BLE
Wireless Range	Up to 5m (16ft) (BLE)
CAN Communication	CANOpen for PN3H J1939 for PN2 (BBWC4 and later versions)
Protection	Over Voltage Reverse Polarity Protection
Packaging	UL 94V-0 Pollution level 3 protection (dusty environment) IP-54 Enclosure

DISPLAY DESCRIPTION & SETTINGS

Main Screen

The HAWKER® ABI™ advanced battery interface has a Touch Screen TFT 4.3 inch.

Figure 1: Main Screen

Activation Button (only PN3H):

- Acknowledge warning
- Turn on: short press will turn the battery on
- Turn off: long press 3-5 seconds will turn the battery off

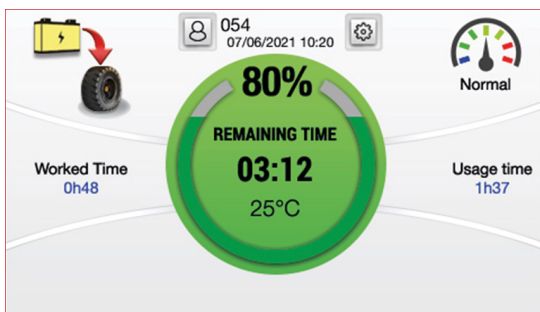

Press to Switch to Screen 2

DISPLAY DESCRIPTION & SETTINGS

Battery Errors for PN3H HAWKER FLEX® Li3 and HAWKER FLEX® Elite TPPL Batteries

Time with discharged current > current threshold menu (2A). Reset when on charger.

Active warnings (Level >=3).

Time spent since the start of the discharge. Traction ON (can be idle or worked time).

Icon to acknowledge fault.

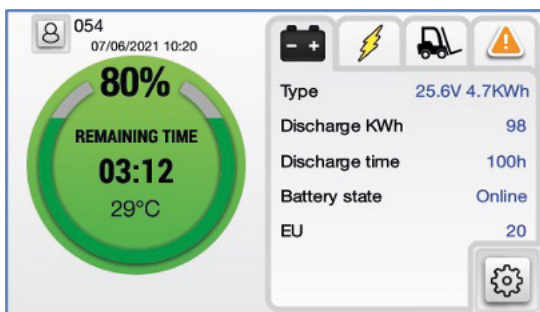

Overload current warning (90% of the max limit)

*Applies to North American version only; please contact your HAWKER® representative for more details.

Screen 2

Battery details

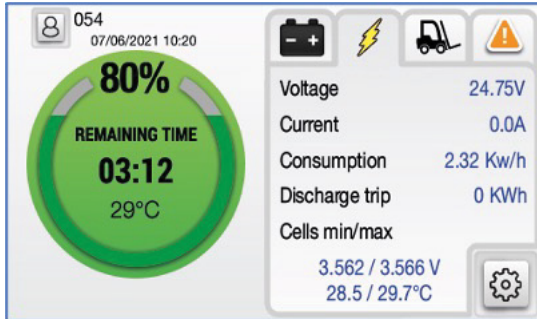

- Type: Nominal battery voltage & kWh
- Total discharge kWh since the start
- Total discharge time since the start
- Battery status: Offline (traction off)/Online (traction on)/Error
- EU: Equivalent Battery Unit = One cycle of 80% of the rated battery capacity

DISPLAY DESCRIPTION & SETTINGS

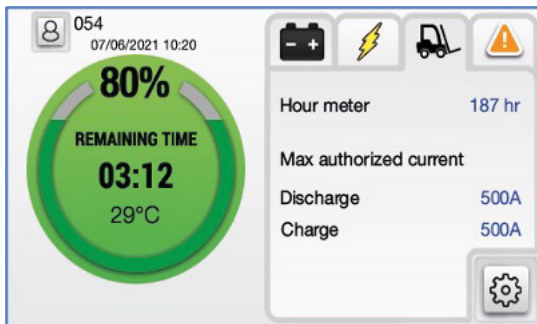

Screen 2 (cont.)

Cycle/trip details

- Real time battery voltage
- Real time current
- Average consumption (trip)
- Discharged kWh (trip)
- Real time cells voltage min and max
- Real time cells temperature min and max

Truck information

- Truck hour meter: counting the time the truck is driving with discharger current > 2A
- Overload discharge: max discharge current allowed, change over the SoC and battery temperature
- Overload charge: max charge/reinjection current allowed, change over the SoC and battery temperature

Active warning

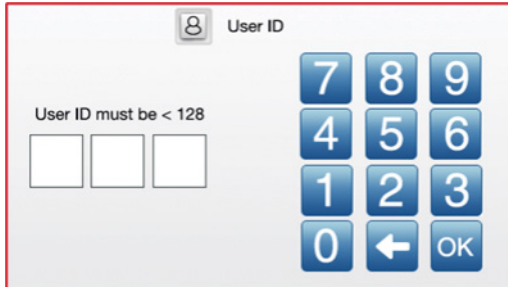

- Warning/alert with date and ID; refer to user manual if needed

DISPLAY DESCRIPTION & SETTINGS

Screen 2 (cont.)

Password protection and SoC/Relay manual settings

SoC/Relay threshold can be adjusted and set directly on the password protection display.

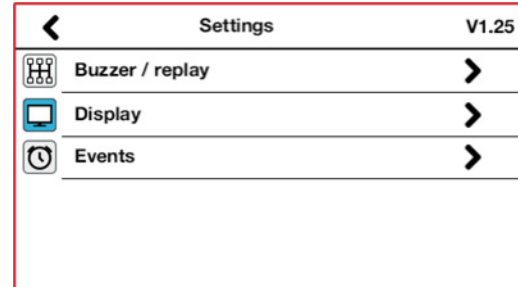

User ID

User ID must be < 128

DISPLAY DESCRIPTION & SETTINGS

Warnings and Settings

Battery Warnings

Icon	Description	Stop Condition
	Warning activated	Check on screen 1
	High temperature	Stop and cool down the battery
	Low water level	Top up the battery
	Cells unbalanced	Stop, charge, and equalize the battery
	Energy throughput too high	Stop and cool down the battery

Buzzer and Relay Settings

Buzzer and Relay Settings are using threshold pre-configured in the HAWKER FLEX[®] Li3, HAWKER FLEX[®] TPPL, and HAWKER FLEX[®] Elite batteries* batteries or BBWC3 & BBWC4 battery monitoring device (BBWC Report suite or HAWKER[®] MOD-ifi™ smart device app).

Syncing of warning/alert settings is not done via Bluetooth[®] connection.

Battery Type	Default Value of the Buzzer vs Battery Type	
	Warning SoC	Alert SoC
Flooded	30% SoC	20% SoC
HAWKER FLEX [®] TPPL	30% SoC	20% SoC
HAWKER FLEX [®] Elite TPPL	10% USoC	5% USoC
HAWKER FLEX [®] Li3	4% USoC**	2% USoC**

*Applies to North American version only; please contact your HAWKER[®] representative for more details

**Are not adjustable

DIMENSIONS AND INSTALLATION

Dimensions

HAWKER® ABI™ advanced battery interface dimensions (mm)

Hawker® ABI™-10
SCALE: 1
28.03.18

Figure 2: Dimensions of a HAWKER® ABI™ advanced battery interface PN2H

Mechanical Installation

Install the HAWKER® ABI™ advanced battery interface fixing bracket on the most suitable part of the truck. The device should be mounted in a position that will protect it from collision with external obstructions.

The bracket can be assembled in various ways to allow a multitude of mounting configurations.

Configurations for mounting the bracket

INSTALLATION

Electrical Installation

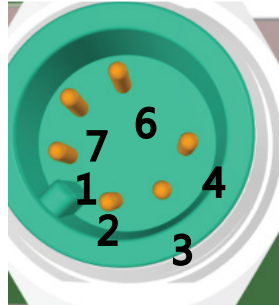

HAWKER® ABI™ advanced battery interface cable specifications

The cable provides a relay (NC) option, according to the following pin-out.

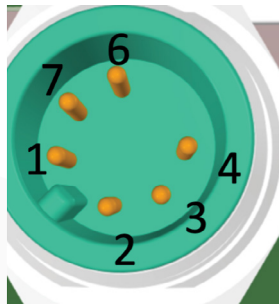

M12A-04PMMP-SF8001	Pin	Description	PN2H Power Supply cable 6LA20737
	1	Reserved	
	2	Reserved	
	3	Relay* (common)	
	4	Relay (NC)	
	5	Not used	

*Relay: 62.5VA/60W – 2A – 250VAC/220VDC

Communication via CAN according to the following pin-out.

M12A-06BFFM-SR8D02	Pin	Description	PN2H CAN cable 6LA01159
	1		
	2		
	3	CANL	
	4	CANH	
	6	GND	
	7	GND	

The cable provides power (12V, 2W), and communication via CAN according to the following pin-out.

M12A-06PMMP-SF8001	Pin	Description	PN3H CAN cable 6LA20750
	1	12V (2W)	
	2	Push button (shorted to GND)	
	3	CANL	
	4	CANH	
	6	GND	
	7	GND	

INSTALLATION

PN2H HAWKER® ABI™ advanced battery interface Flooded and TPPL Batteries

HAWKER® ABI™ advanced battery interface part number 6LA20723-PN2H for Flooded and HAWKER FLEX® TPPL batteries required:

- Power cable 2m/4m = 6LA20737-L2 or 6LA20737-L4
- Metal fixation PN 6LA20738

Connect the supply cable pins on the +VBAT and -VBAT on the battery or on the truck side. If the battery on the truck is not fixed, (see supply cable and power pin on the supply cable images on the next page). Nominal battery voltage: 24V–96V.

Plug the male connector into the right female socket situated on the rear side of the HAWKER® ABI™ .

INSTALLATION & COMMUNICATION

PN2H HAWKER® ABI™ advanced battery interface Flooded and TPPL Batteries (cont.)

Turn the “fastening screw” on the connector to lock the supply cable to the HAWKER® ABI™ advanced battery interface.

Power the HAWKER® ABI™ advanced battery interface by connecting the traction battery to the truck.

To use the CAN capability, the following is required:

- CAN cable 2m/4m = 6LA01159-L2 or 6LA01159-L4
- Connect the CAN cable from the HAWKER® ABI™ advanced battery interface to the CAN on the BBWC battery monitoring device and later versions.
- **Only compatible with fixed batteries (No battery change)**

BBWC battery monitoring device & HAWKER® ABI™ advanced battery interface settings

- The BBWC battery monitoring device must be set with a CAN ID of 255
- Deactivate the BLE option on the HAWKER® ABI™ advanced battery interface
- HAWKER® ABI™ advanced battery interface must be at least at firmware 1.25B

CAN connection to PN2H

PN3H HAWKER® ABI™ advanced battery interface for HAWKER FLEX® Li3 and HAWKER FLEX® Elite TPPL Batteries

HAWKER® ABI™ part number PN3H for HAWKER FLEX® Li3 and HAWKER FLEX® Elite TPPL batteries requires:

- Cable 6LA20750-L2 or 6LA20750-L4
- Metal fixation PN 6LA20738

Connect the device directly on the right 6-pin connector for power and CAN communication. The left connector is not used.

Connection to HAWKER FLEX® Li3-BMS

Connection to HAWKER FLEX® Elite TPPL-BMS

COMMUNICATION

Communication

There are two modes of communication (Wireless and CAN) available on the HAWKER® ABI™ advanced battery interface:

Wireless-Bluetooth®

- Connect to the BBWC3/BBWC4/Later versions

CAN (Controller Area Network)

- For PN3H - CANopen Cia 418
- Interface with battery via BMS (HAWKER FLEX® Li3 & HAWKER FLEX® Elite TPPL batteries)
- For PN2H - BBWC4 firmware version J1939 V7.9-15 or higher
- Not compatible with CANopen firmware

Handshake with BBWC battery monitoring device (3, 4 and later versions) & flooded, HAWKER FLEX® TPPL batteries

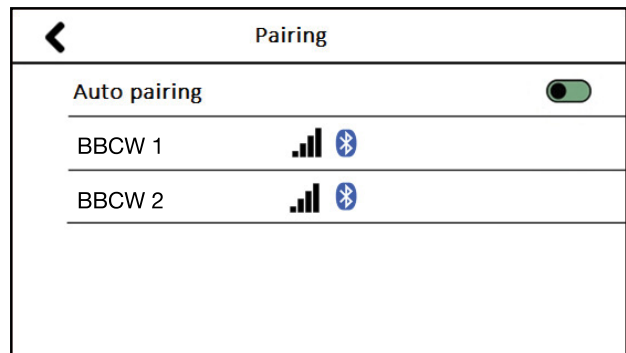

Manual Procedure

- Navigate to: 1) Settings 2) I/O 3) Pairing 4) Disable Auto pairing
- Click BLE icon and select the correct BBWC battery monitoring device that appeared with the associated battery serial name

*Applies to North American version only; please contact your HAWKER® representative for more details

Auto Pairing

- Navigate to: 1) Settings 2) I/O 3) Pairing 4) Enable Auto pairing.
- The device will pair automatically with the BBWC device connected to the traction battery, which is powering the HAWKER® ABI™.
- Auto pairing requires movement/operation of truck with current >5A.
- This synchronizes current & shock sensor. It can take 1 to 5 minutes.
- Refer to BBWC4 owner's manual to configure via BBWC Report or HAWKER® MOD-ifi™ smart device app.

Handshake with BBWC4 CAN battery monitoring device & HAWKER FLEX® Li3 and HAWKER FLEX® Elite TPPL batteries*

No Pairing Required

- Refer to BBWC4 or CDI owner's manual to configure via BBWC Report or HAWKER® MOD-ifi™ smart device app. The SoC and relay limits will override any pre-configuration in the HAWKER® ABI™ advanced battery interface smart battery dashboard.

*Applies to North American version only; please contact your HAWKER® representative for more details
